NIHARIKA

Finance & Data Analyst

niharikarao.pro@gmail.com | +91 8982409026 | Gurugram,Haryana | linkedin.com/in/niharika03

PROFESSIONAL SUMMARY

Detail-oriented Finance & Data Analyst with hands-on experience in financial data cleaning, MIS reporting, budget tracking, and Power BI dashboards. Skilled in SQL querying, Python-based data transformation, and building finance dashboards that support P&L analysis, expense tracking, and cash flow reporting. Certified by Tata iQ, Deloitte Australia, and Kaggle.

WORK EXPERIENCE

Associate Data Analyst · **Align Info Solutions** · Noida, UP *2025 Sep – Aug 2026*

- Cleaned and standardised financial, sales, and HR data from multiple sources — removed duplicates, corrected formatting errors, and filled missing values before loading to reporting tables.
- Wrote SQL queries to extract, filter, and transform financial data for weekly and monthly MIS reports shared with finance and management teams.
- Built and maintained Power BI dashboards for finance, sales, and HR teams — including expense tracking, net profit trends, and cash flow summaries.
- Performed routine data quality checks on financial datasets to catch outliers, null values, and inconsistencies before reports reached stakeholders.
- Coordinated with senior analysts to understand finance reporting requirements and ensure data accuracy for dashboard use.

KEY PROJECTS

Finance Data Cleaning & Dashboard

- Cleaned 3 years of financial data with 1,200+ issues — fixed broken Excel formulas, corrected currency mismatches, and removed duplicate fiscal entries across quarterly sheets.
- Organised expense data into consistent categories using Python (Pandas) and corrected date errors across periods.
- Delivered a Power BI dashboard tracking net profit, expense ratio, and cash flow — identified a 17% Q3 overspend that prompted cost review.

Sales Data Cleaning & Reporting Dashboard

- Cleaned 8,000+ raw sales records — fixed mixed date formats, removed ~320 duplicate rows, filled ~600 blank fields using Excel and Python (Pandas), then loaded to MySQL.
- Built a Power BI dashboard showing sales by product, region, and customer; used in weekly sales review meetings for KPI tracking.

HR Attrition Report

- Cleaned 1,400+ employee records with blank tenure fields, wrong department codes, and inconsistent job titles using Python and Excel.
- Built a Power BI attrition report highlighting high-risk employee groups by department and tenure for HR decision-making.

CORE SKILLS

Finance Skills: Financial Data Analysis, MIS Reporting, Budget Tracking, P&L Analysis, Expense Reporting, Cash Flow Dashboards
Languages: Python (Pandas), SQL
Tools: Power BI, Excel (Advanced), MySQL, Jupyter Notebook, Tableau
Analytics: Data Cleaning, KPI Tracking, ETL Basics, Data Visualisation
Soft Skills: Analytical Thinking, Attention to Detail, Stakeholder Communication
